INTERNSHIP AND EXPERIENCE

07/2024 - 09/2024

- AWS AI/ML Virtual Internship**
AICTE - Eduskills
 - Gained hands-on experience in Artificial Intelligence and Machine Learning concepts using AWS services.
 - Worked on projects involving data preprocessing, model training, and deployment using AWS Sagemaker.
 - Implemented machine learning algorithms for predictive analytics and classification tasks.
 - Developed skills in AWS AI/ML tools such as AWS Lambda, S3, and EC2 for scalable ML solutions.

EDUCATION

2025

- Galgotias University**
Master of Computer Applications
7.17

2023

- Utkal University**
Bachelor of Science
8.1

SKILLS

- Oops Java
- Python
- Html
- CSS
- Javascript
- React js
- SQL
- mongo DB
- Basic DS

PROJECTS

- Flipkart Data Analysis**
Tools: Python, Pandas
 - Analyzed large datasets from Flipkart to identify sales trends, customer preferences, and product performance.
 - Utilized Pandas for data cleaning, transformation, and statistical analysis to uncover actionable insights.
 - Conducted in-depth analysis of top-selling categories, customer purchase behavior, and peak sales periods.
 - Provided data-driven recommendations to enhance business strategies and optimize sales performance.
- Diabetics Predictions**
 - Built a machine learning model to predict diabetes risk using classification algorithms like Logistic Regression and Random Forest.

- Preprocessed medical and lifestyle data through feature selection and normalization using Pandas.
- Evaluated model performance with accuracy score and ROC-AUC, providing insights into key diabetes risk factors.
